PREFACE

At the outset I wish to state that I am not an Astrologer by profession. I had a keen interest in occult sciences from boyhood and there was an inner urge in me that I should learn occult sciences to an extent of perfection.

I heard about my grand father, from the people of our village that he was a priest, follower of Sakthi cult, very popular during his time. He was able to speak to goddess Sakthi in person. He was able to foresee the future events in advance. He was guiding our village people in spiritual path. He passed away when my father was about 3 years old. Therefore, there was no chance to get his guidance. I could only hear about him.

I heard about another relative, he was almost of my grandfather's age. He was an Astrologer, a devotee of Lord Shiva. He was leading a very simple life. He was known for his poetical talent in Tamil language. He was sympathetic towards all the living beings, never harmed any one. Whatever he predicted, every thing would become true even his own death. He did not practice astrology as a profession. He was only serving the society by guiding the people in proper path, through astrology. Unfortunately I could not get any guidance from him because he passed away, during my boyhood.

To my surprise, both of my ancestors never had any schooling. They were just farmers by profession. These two people only inspired me to learn occult sciences. I approached some Astrologers, for guidance, they did not want to teach me astrology for their own reasons. I read hundreds of books on astrology and other allied subjects written by different authors. I found that there are so many methods in astrology for interpreting the horoscope, mostly confusing and each author is advising the reader to follow his method and claiming his method only is correct and accurate all other methods are wrong. But none of them could explain the logic behind every principle they follow. Most of them just translated the books written in Sanskrit (or) Tamil. No one has come out with their original Ideas. It is the same food of same taste, every one has cooked. But it is only my revered guru Shri R.G.Rao, has cooked food with different taste. He is the first man to write about Nadi astrology. It is from him I learned Nadi Astrology. Therefore I do not claim originality in thought and ideas. I am always grateful to him for making me perfect to some extent in this science. I can boldly say that he has really given a life to the science of Astrology. He has removed all the difficult knots and solved almost all the puzzles in the science of astrology.

I sincerely bow down my head before all the authors who have contributed to astrology.

As the bee's collects honey from various flowers and stores it in a honeycomb. I also collected information from various books and putting them together in this book for the benefit of readers. I hope every reader would like this book as every one likes honey for its sweetness.

INTRODUCTION

Astrology is a divine science. Astrology is a Vedanga. Hindus consider it as an eye of Vedas. It enables one

- (a) To know the future
- (b) To know the good and bad period
- (c) To know the auspicious and inauspicious times etc.

Astrology can guide us almost in all walks of our life. Unfortunately in the recent past some of self-styled astrologers have failed to impress the public, due to either lack of knowledge in this science or some other reason. The failure of these self-styled astrologers made the public to think that astrology is only a superstition and it is a pseudo science.

No science is perfect. It is a human habit to err. A great scientist may some times fail, Similarly a doctor may also fail and may not be successful in all cases which he treats as such we cannot condemn the medical science out right as we do in case of astrology when ever an astrologers prediction fails. By wrong diagnosis of disease and administering wrong medicines a doctor may kill a patient. Similarly a lawyer fails as a result of which his client gets himself involved in financial loss. An engineer may fail and cause immense loss. Usually we do not consider the scientist, the doctor, the engineer and the lawyers are not cheats because they have failed once or twice in their profession. The same logic should apply equally to an astrologer. Merely because of one or two predictions failed an astrologer should not be branded as a cheat.

Many people contest that stars and planets cannot affect human beings on earth, but the practical experience of thousands of years has confirmed that planets profoundly influence life on earth.

Full moon and new moon are said to have influence on some people. The word lunatic originated thousands of years ago. From this it is evident that men long ago noticed a connection between the moon and mental instability. Many diseases such as Asthama and epilepsy have a direct connection with moon. The menstrual cycle in women happens with in the lunar cycle of twenty-eight day. Those who are practicing meditation will have good concentration on the day of full moon and new moon. This phenomenon can be practically verified. Medical plants grow due to the influence of moon. If we take rest in an open ground under the moon mental tranquility and peace can be felt.

Plants grow in sunlight by taking water and other minerals from earth. So far the growth of plants, sunlight is very important. Without proper sunlight the growth of the plant will be affected. During the daytime all the living beings will be active and during the night time all the living being will be in sleeping state. Day and nights are formed due to the rotation of earth about its own axis. Seasons are formed due to the rotation of earth around the sun. Because of seasons, many changes takes place in human beings, animals and plant life.

In cold countries people are white in complexion and in hot countries they are black. All these changes take place only because of different climatic conditions. In the

similar manner all the planets affect the human beings on earth. The rays of every planet have some special qualities like metals and chemicals. Just like chemical changes, the rays of the planets if they combine in a house under go certain changes and the results vary according to the nature and position of the planets.

If a person knows before hand that some thing is going to happen in future. He mentally and physically prepares himself by taking precautionary measures to face the situation boldly and try to over come the situation to get success easily instead of getting defeated. If same calamity happens suddenly when he is not ready to face it. That is why we must know at least some indication regarding what is going to happen in future, in general, and what is going to happen in near future in particular.

If a person knows his future before hand, he will not face any kind of disappointment. As a preventive measure, if propitiation is done for bad and ill placed planets the intensity of bad result will be reduced and the person may be saved from accidents and diseases.

A weak person may become strong by doing exercise and by taking proper medicines and health tonics. In the same manner, by doing propitiation, the planetary influence will be modified, the intensity of bad effects will be pacified and good results will follow i.e. longevity will be increased, accidents can be avoided. There is no doubt about it.

Astrology is not only a guide in one aspect, but it is a guide for other sciences also. Astrology will be a guide in weather forecasting, physiology, psychology, geography, architecture, medical science etc.

ELEMENT'S OF ASTROLOGY

THE ZODIAC

The earth rotates on its own axis and this rotation is done in one day or 24 hours. Earth revolves round the sun and this takes one year for one complete revolution. The path of the earth round the sun is called the ecliptic and the zodiac is a belt in the neighborhood of celestial equator extending 8 degree on either side of the ecliptic and measuring 360 degrees.

The zodiac surrounding the earth is circular in shape and is divided into 12 equal parts of 30 degrees each for the purpose of Astrology and each division is called sign (RASIS) and are named as under.

5. Simha	Leo	(120-150 deg)
6. Kanya	Virgo	(150-180 deg)
7. Thula	Libra	(180-210 deg)
8. Vrischika	Scorpio	(210-240 deg)
9. Dhanus	Sagittarius	(240-270 deg)
10. Makara	Capricorn	(270-300 deg)
11. Kumbha	Aquarius	(300-330 deg)
12. Meena	Pisces	(330-360 deg)

Each sign derived its name from its resemblance to the group of stars formed in each division.

THE CONSTELLATIONS

The Zodiac is divided in to 27 nakshatra zones (or) constellations of 13 deg 20' min each for the purpose of Astrology. These Nakshatras are fixed stars and self-illuminated. They are named as under:

1. Aswini	10. Makha	19. Moola
2. Bharani	11. Pubha	20. Poorvashada
3. Krittika	12. Uttara	21. Utharashada
4. Rohini	13. Hasta	22. Sravana

8. Pushya	17. Anuradha	26. Uttara bhadra pada
9. Aslesha	18. Jyesta	27. Revathi

The nakshatras (or) constellations are divided into 4 equal parts and each part is called nakshatra pada. Rasi is equal to 9-nakshatra pada. The zodiacal sign and the division of constellations are shown below in a diagram .

THE HOROSCOPE

A Horoscope is a map of the heavens for a given moment which may be the birth time of the child (or) the time of an event taking place (or) the time of the query. Horoscope will contain the details of planetary position, Rasi chart, Navamsa chart and Dasa Bhukti details. Horoscopes are prepared with the help of Almanacs (or) Ephemeris.

Rasi chart is a map of heaven which shows the planetary position at given moment of time of birth of child (or) time of inquiry.

/LAG			KETU

Lagna means the rising Sign at the time of birth. Rasi means the sign occupied by the moon at the time of birth. In the above chart Lagna is Dhanus. Rasi is Simha (because Moon is in Simha). The rasas are also called Houses (or) Bhavas. The Lagna sign will represent the first house. When we count from Lagna clock-wise, the second sign is called second house. Like wise the twelve houses are considered while analyzing the horoscope.

Navamsa chart is a ready reckoner through which we can easily find-out the Nakshatra pada in which the planets are posited. Navamsa chart is also drawn in the similar manner of Rasi Chart .

NECESSITY OF CONVERSION OF RECORDED TIME OF BIRTH INTO LOCAL MEAN TIME:

All the births are recorded in Standard time. Standard time is a uniform clock time used throughout the country, based upon the local mean time of a certain geographical meridian passing through the country and arbitrarily chosen by law, for the sake of convenience and facility. All watches and clocks are accordingly set to show the time.

Countries with large land area and several meridians passing through that country will have different local mean time depending on the longitude of the place. Therefore, the time of birth recorded from the clock is not the actual time of birth.

Local mean time at any given meridian is the true mean time at all places which lie on that meridian, irrespective of the latitude. Therefore, it is necessary to convert the Standard time (clock time) into local mean time. To convert the Standard time into local mean time add (or) subtract 4 minutes to every degree of longitude according to the place is in East or West of Standard Meridian. In India the Standard meridian is 82 deg 30 min East of Greenwich.

CASTING OF HOROSCOPE

Details required for casting the horoscope:

1. Date of birth
2. Time of birth
3. Place of birth

I step: Convert the recorded time of birth into local mean time.

II step: Find out the date of birth in the Almanac in a particular year and note down all the details given for that day in the Almanac. In most of the

Almanacs position of the planets are given in Nakshtra Padas and by copying them, Rasi and Navamsa chart can easily be drawn.

TO FIND OUT JANMA LAGNA OR ASCENDANT:

III step: In some almanac's (Panchanga's) every month, for every date the beginning or ending times of lagnas will be given in a table form. By observing those tables the lagna can be fixed for the time of birth of the child.

In some Panchanga's the date-wise tables are not given for different lagnas. But either the balance portion of rising sign on every day of a month at sunrise will be given or the elapsed portion of rising sign at sunrise will be given. If the elapsed portion of rising sign at sunrise is given, from this balance portion of that lagna is to be found out by deducting the elapsed portion from the total duration of rising sign, then by adding the duration of subsequent lagnas, the lagna at the time of birth can be found out. From that we can find out the elapsed portion and balance portion of the lagna at the time of birth. This is explained in the next paragraph.

Note down the time of sunrise on the day of birth. Deduct sun rise time from birth time. So you will get the elapsed time from sunrise in hours. Convert the hours into Ghatikas (or) Nazhikas.

24 hours – 60 Ghatikas

24 minutes – 1 Ghatika

24 seconds – 1 Vighati

Example:

For instance the native was born at Chennai at 11-31 AM on 14th day of April 1997 corresponding to the cycle year Prabhava in Solar Month Mesha (Chaithirai) 1st Tuesday.

The Sun rise at Chennai on 14.4.1997

6-01 AM

The birth time of the native

11-31 AM

Deducting the sun rise time from the birth time we get 5 hours and 30 minutes.

5 hours is equal to 12 Ghatikas

30 Vighatikas

30 minutes is equal to 1 Ghatikas

15 Vighatikas

Total 13 Ghatikas

45 Vighatikas

Therefore, the birth has taken place at 13 Ghatikas 45 Vighatikas. (This is called Udhayadhi Nazhikas.

TO FIND OUT THE BALANCE OF RISING SIGN ON THE DAY OF BIRTH AT SUNRISE:

- (i) If the Almanac is referred, you can find out the Ghatikas remaining to be covered (Balance portion of rising sign at sunrise) by the sun in the solar month when the child was born against solar date of birth.
- (ii) Without referring to the Almanac, we ourselves can work out the balance portion of rising sign at sunrise. On the first day of Mesha (Solar month Chittirai) the first deg of Mesha rises in the Eastern horizon at sun rise and the remaining signs gradually ascend till the next day at sun rise, On the second day of mesha the sun rise will take place in the second degree of Mesha. The Sunrise takes place in the last degree of Zodiac on 30th day of Meena, when the solar year ends. Thus the Lagna (or) Ascendant is the particular point of ecliptic considered with

reference to particular horizon. Certain period of time is allotted to each of the Zodiacal Signs to rise, the duration of such periods will vary depending upon the latitude of the place. This is called Rasimana.

The degree and the sign in which; the sun rises at the time of birth will be ascendant at that particular time. From the Almanac find out in which solar month the child is born. Note down the total duration of rising Sign (Rasimana) for the given solar date of that month for the given latitude of the birth place, calculate the balance of rising sign at sunrise on the day of birth and note down the total duration of subsequent signs also. Rasimana is given in Ghatikas and Vighakitas. Divide the total duration of rising sign (Rasimana) by the total number of days of solar month. You will get the movement of sun in one day. Multiply it by number of solar days crossed by sun (i.e. upto previous day of birth) till sun rise on the day of birth. Add the duration of next Signs rising with the Balance of rising sign on the day of birth (solar day) till you get the time of birth in Ghatikas. Find out in which sign the Lagna falls. Note down duration of Lagna sign. Divide 30 deg by total duration of the Lagna sign and Multiply it by the time of birth in Ghatikas after sun rise. You will get the degrees and minutes passed by Lagna. We know that each sign is composed of 30 deg and 9 Quarters of constellation. So one quarter of sign will measure $30/9=3\frac{1}{3}$ deg (3deg 20 minutes). By which we can easily find out in which Nakshatra pada the Lagna falls.

POSITION OF THE MOON

Examine the Almanac and find out the constellation (or) ruling star at the time and day of birth. Find out the total duration of the star. Divide it by 4, you will get duration of one Nakshatra pada. Calculate the balance portion of the Nakshatra at the time, and day of birth by deducting the elapsed portion of Nakshatra from total duration of the Nakshatra. Find out in which Nakshatra pada, the ruling star falls by working out number of Nakshatra pada elapsed at the time of birth.

DASA BHUKTI

Divide the total Dasa period by total duration of the ruling star and multiple it by balance portion of ruling star. You will get the balance of Dasa period in years, months, and days.

NAVAMSHA

Work out the total number of Nakshatra padas from Aswini 1st pada to the star pada in which the planet is posited. Divide the total no. of padas by 12. Count the reminder from Mesha you will get the Navamsa sign in which that planet is posited.

Here fire is not simply fire but all those things which have fiery effects; such as acids which also burn a man. Earth means solid things, air means gases, water means not only water but all the liquids. This classification will help the Astrologer in assessing what troubles (or) injuries the person will be subjected to in his life and these sufferings will be due to what reason i.e., by burning, by striking a solid object, by gases (poisonous gases (or) steam (or) breathing trouble etc) or by a liquid. Similarly in case of house destruction whether it will be by fire (or) by flood (liquid) etc.

IMPORTANT POINTS TO REMEMBER FOR STUDYING HOROSCOPE

1. All Planets move from one Rasi to the other in clockwise direction and Rahu and Kethu always move in anti-clockwise direction.

2. THE ORDER OF STRENGTH OF THE PLANETS

- a) Rahu and Kethu – Strongest
- b) Surya
- c) Chandra
- d) Sukra
- e) Guru
- f) Sani
- g) Kuja
- h) Budha -- Weakest

3. THE ORDER OF POSITIONAL STRENGTH OF THE PLANETS

- a) Exaltation Sign (UCHA STHANA) -- Strongest
- b) Moola Thrikona Sign
- c) Own Sign (SWASTHANA)
- d) Friendly Sign (MITHRU STHAN)
- e) Neutral Sign
- f) Enimical Sign (SATRUSTHANA)
- g) Debilitation Sign (NEECHASTHANA)-Weakest

4. COMBUSTION OF PLANET (ASTANGATHA)

If a planet and Sun are in the same quarter of a Star, then that Planet is said to be in Combustion. A combust planet is capable to produce common type of results. It is true that a combust planet is weak. But it is not true that its effects become nil. Venus and Mercury have no Astanga Dosha.

5. PLANETARY WAR (GRAHA YUDHHA)

Except Sun, if any planet is in association with MARS (KUJA) then that planet is said to be in planetary war.

6. DEFEATED PLANET

When a planet is in association with an enemy planet and its degrees are less than that of enemy planet then that planet is said to be a defeated planet.

7. WINNING PLANET

When a planet is in association with an enemy planet and its degrees are more than that of enemy planet, then that planet is said to be a winning planet.

8. RETROGRESSION OF PLANETS (VAKRATHWA)

Generally all planets move from one Rasi to the other Rasi in clockwise direction and Rahu and Kethu move in anti-clockwise direction. Some times we see that a planet, instead of moving in clockwise direction in the Zodiac seems to be moving in anti-clockwise direction. Whenever a planet is moving in anti-clockwise direction in the Zodiac, it is said to be in retrogression.

Sun and moon will never Retrograde
Rahu and Kethu are always in Retrogression.

8. RETRO-DIRECT MOTION

Whenever a planet assumes retrograde motion in a Zodiacal sign, continue to move in anti-clockwise motion in that particular sign for some time, stops its anti-clockwise motion and returns to its original position with clockwise motion. Till the planet returns to the exact longitude in degrees, minutes, seconds where from it became retrograde, it is said to be retro-direct motion. It is only after it moves clockwise from the exact location of retrogression that is said to be in direct motion.

9. STATIONARY PLANETS (STAMBANA)

The planets seem to remain stationary for some time after being in motion. This planetary condition is known as STAMBANA.

10. Generally the signs are counted clockwise from Mesha to Meena, in Rasi chart used in Tamilnadu. The signs are counted anti-clockwise from Mesha to Meena in Rasi Chart used in Andhra Pradesh and North India.

11. Rahu and Kethu will be moving always 180 deg opposite from each other in the Zodiac. Mercury is always moving either in the same sign or 12th sign or 2nd sign from Sun. It will never move away more than one sign either in the rear or in the front side from Sun. Venus will be always moving between 1st, 2nd, 3rd, 11th or 12th sign from Sun. It will never move away more than two signs either in the rear or in the front side from Sun.

12. Before making an attempt to predict, it is desirable to verify three or four past events of the natives live. This will be of use to gauge the strength of the planets as well as the correctness of the planetary position. In a way this will be helpful to correct the planetary positions as Almanacs or Panchanga's differ in giving planetary position.

13. NATAL CHART

Natal Chart means Birth Chart. This is prepared based on the time, date, month, and year of Birth of the native.

11. TRANSIT CHART

This chart is prepared at the time of consultation i.e. the time, date, month and year of consultation.

12. PARIVARTHANA YOGA (PLANETARY EXCHANGE)

We know the ruling planet of each Rasi. Some times we can observe that the planet (A) is occupying the Rasi owned by the planet (B) and the planet (B) occupies the Rasi owned by the planet (A). This phenomenon is called planetary exchange or Parivarthana Yoga in astrology. For example: When Mars is located in Venus's house VRISHABHA and Venus is located in Mars's house VRICHKA, it is understood that the planet Mars and Venus are involved in Planetary exchange. This yoga is given more importance in Nadi astrology, because unexpected events take place due to this Parivarthana yoga.

NADI RULES

1. Weak planets: The planets are said to be weak, if

- a) The planet is in debilitation
- b) The planet is defeated
- c) The planet is in enemy's house
- d) The planet is in between two enemy planets
- e) The planet is in association with Rahu and Ketu
- f) The planet is in Combustion
- g) The planet is in association with enemy planets
- h) The planet is aspected by enemy planets.

2. STRONG PLANETS

The planets are said to be strong if

- a) The planet is in exaltation
- b) The planet is winning
- c) The planet is in friendly house
- d) The planet is in between two friendly planets
- e) The planet is in own sign
- f) The planet is in association with friendly planets
- g) The planet is aspected by friendly planets

3. A planet will always give Karakatva results of the conjoining (or) aspecting planets.

4. Irrespective of the Sign in which a planet is located it will give beneficial results if friendly planets are aspecting the considered planet from the following places.

1 – 5 – 9 (Same direction) from considered planet

3 – 7 – 11 (Opposite direction) from considered planet

2 - 12 (front and rear) from considered planet

It will give bad results if enemy planets are aspecting the considered planet from the above places.

5. If a planet is not conjoined with or aspected by any other planet (the above aspects) it will give the Karakatva results of Rasi (Lord) in which it is placed.
6. Even though a planet is not conjoined with or aspected by any other planet, it will give beneficial results, if it is involved in planetary exchange with friendly planet and conjoins the friendly planet or getting the aspect of friendly planet after exchanging the house. It will give bad results if it is involved in planetary exchange with enemy planet and conjoins the enemy planet or getting the aspect of enemy planet after exchanging the house.
7. Whenever a planet is located in the same star pada in which Sun is located, it is said to be in combustion. The planet will not give much result. If the combust planet involved in planetary exchange with friendly planet or conjoining the friendly planet or getting the aspect of friendly planet after exchanging the house. It will give beneficial result. If the combusted planet is involved in planetary exchange with enemy planet or conjoining an enemy planet or getting the aspect of enemy planet after exchanging the house, it will give bad results.
8. When a debilitated planet is involved in planetary exchange and conjoins the friendly planet or getting the aspect of friendly planet after exchanging the house, we must assume that the debilitation is cancelled (Neechabhanga). If it conjoins enemy planet or getting the aspect of enemy planet after exchanging the house, it will give bad results.
9. Even though a planet is in debilitation, if friendly planets are aspecting the debilitated planet from the following places you must assume that the debilitation is cancelled.
 - 1 – 5 - 9 (same direction) from debilitated planet
 - 3 – 7 – 11 (opposite direction) from debilitated planet
 - 2 – 12 (front and rear) from debilitated planet
 If enemy planets are aspecting the debilitated planet from the above places, it will give bad results only.
10. When an exalted planet is involved in planetary exchange and conjoins an enemy planet or getting the aspect of an enemy planet after exchanging the house, it will give bad results. Hence we have to assume that the exaltation is cancelled. (Uchabhanga). If it conjoins a friendly planet or getting the aspect of friendly planet after exchanging the house, it will give beneficial results.
11. A retrograde planet will always aspect the rear sign with half aspect.
12. Retrograde planet will give beneficial results if a friendly planet is placed in 12th sign from retro planet. It will give bad results if an enemy planet is placed in 12th sign from retro planet.

13. If a debilitated planet is in retro motion and if a friendly planet is placed in 12th sign from retro planet it will give beneficial results. Hence, we have to assume that the debilitation is cancelled. If an enemy planet is placed in 12th sign from the retro planet, it will give bad results only.
14. If an exalted planet is in retro motion and an enemy planet is placed in 12th sign from retro planet it will give bad results. If a friendly planet is placed in the 12th sign from retro planet it will give good results only.
15. If a planet is placed along with Rahu then that planet loses its strength. Even if it is an exalted planet.
16. Always consider the planetary Karakatvas for interpreting the charts
To know,
 - (a) the character, appearance of the person consider
 - (i) Jupiter as Jeevakaraka for Males
 - (ii) Venus as Jeevakaraka for Females
 - (b) for Education consider Mercury as a Budhikaraka
 - (c) for Profession consider Saturn as a Karmakaraka
 - (d) for Elder brother consider Saturn
 - (e) for Younger brother (2nd) consider Mars
 - (f) for Younger brother (3rd) consider Mercury
 - (g) for Elder sister consider Moon
 - (h) for Younger sister (2nd) Venus
 - (i) for Younger sister (3rd) Mercury
 - (j) for Wife consider Venus
 - (k) for Husband consider Mars
 - (l) for Father consider Sun
 - (m) for Mother consider Moon
 - (n) for Paternal Grand Father consider Rahu
 - (o) for Maternal Grand Father consider Ketu
 - (p) for Maternal Uncle consider Budha
 - (q) for Girl/Boy friend consider Budha
 - (r) for Mother-in-law consider Moon
 - (s) for Father-in-law consider Mercury
 - (t) for Finance consider Venus
 - (u) for Vehicle consider Venus

Note : Rahu and Ketu's aspect will fall in the same direction only (1,5,9). They will not aspect The opposite direction. As Rahu and Ketu are always in Retrogression, they will Aspect the rear sign too (12th Sign).

TRANSIT RESULTS

According to traditional astrology, the movement of the planets through twelve rasis of Zodiac from natal moon (Janma Rasi) or the JANMA LAGNA of the native is called Gochara or transit. According to the position of a transit planet from natal moon or lagna in the birth chart, the effects will change. We read that the Jupiter in the 2nd from natal moon gives rewards, profit and gain of money. Saturn in the 2nd from the natal moon gives sorrows and accidents. These are only general principles. These principles will not be applied to our charts. The yogas (combinations) present in the horoscope will become operative, during the transit of the slow moving planets Saturn and Jupiter and other slow moving planets Rahu and Ketu.

Jupiter is dharma karaka, he represents the free will of the person. Therefore Jupiter will give the personnel result according to the sign he transits and the aspect he receives from natal planet. Jupiter will indicate the desire or the ambition of the person according to the nature of the planet aspecting from birth chart. Saturn is karma karaka, he represents the fate of the person. Therefore Saturn will give the results which are the rewards of the karmas performed in the previous birth. It will be a good result if the person has performed good karmas, it will be a bad result if the person has performed a bad karma in his previous birth. The effect of the planets will be felt only when the transit planets and the planets in the birth chart interact with each other. If the transit planet is not associated or aspected by any natal planet then there will not be any significant event in the person's life. Actually the karakathwa, result of the aspecting natal planet will be felt when the transit planets especially Saturn and Jupiter receives such aspects. The age of the person must be kept in the mind while giving the timing of the events. When natal Venus aspects transit Jupiter the person will get married. This result is applicable only to the unmarried people. If he is a married person, for the same aspect we have to predict that there will be a birth of daughter. When natal Mercury is aspecting transit Jupiter, the person will do well in studies. If we give this prediction to a 2 year old child or to very old person it will not be applicable. Therefore, while giving prediction we must take the age of person into consideration.

It must be kept in the mind that the transiting planet may get the aspect of natal planets either from the same sign in which he is transiting or 2nd, 3rd, 5th, 7th, 9th, 11th or 12th from transiting sign. For example, Saturn is transiting Mesha, in natal chart. If Mars is Posited in Mesha itself in the natal chart or in the following places i.e, Vrishaba, which is 2nd from Mesha, Mithuna which 3rd from Mesha, Simha which is 5th from Mesha, Tula which is 7th from Mesha, Dhanus which is 9th from Mesha, Kumba which is 11th from Mesha, Meena which 12th from Mesha, the same result will be felt during the transit i.e., the person will be troubled by enemies but the percentage of the result will differ according to the aspect.

If aspect is from the same sign, then the result will be 100%. If the aspect is from the 2nd sign, then the result is 75%, from the 3rd sign 50%, from 5th sign 75%, from 7th sign 50%, from 9th sign 75%, from 11th sign 50% and from 12th sign 25%.

Example:

	SANI	BUDHA SURYA	KUJA	GURU			
RAHU	RASI BIRTH CHART		SUKRA	TRANSIT CHART 1998			
			KETU				
		GURU	CHAND				

In the above chart, in the year 1998, when Jupiter was transiting Meena rasi, the native got married. If we observe closely, in the above birth chart, Venus is in Cancer, which is 5th sign from Meena, therefore the transit Jupiter located in Meena gets the aspect of natal Venus located in Cancer in the birth chart. when transit Jupiter is aspected by natal Venus, marriage will take place.

Example:

RAHU	SANI						
	RASI BIRTH CHART		SUR SUKRA BUDHA KUJA	TRANSITION 1989			
			GURU CHAND				
			KETU	SANI			

In the above chart, in the year 1989, when Saturn was transiting Dhanus rasi, the native got appointment in Govt. Dept. In the birth chart Guru and Chandra both are in Simha rasi, which is 9th sign from Dhanus. Therefore the transit Sani located in Dhanus gets the aspect of natal Jupiter and Moon located in Simha. when transit Saturn is aspected by natal Jupiter, the person will get a job or promotion. When transit Saturn is aspected by natal Moon, the person will have change of place. Therefore, the native got appointment in a different place.

Example:

KETU			SUN
	RASI BIRTH CHART		MERC MOON
			VENU MARS
SAT		JUPI	RAHU

SAT	TRANSITION 1995		

In the above chart, in the year 1995 when Saturn was transiting Kumba rasi, the native faced lot of difficulties. Since natal Mars was aspecting transit Saturn from Simha rasi which is 7th from Kumbha rasi, natal Ketu was also aspecting transit Saturn from Meena rasi which is 2nd from Kumba rasi. However, natal Venus aspect over transit Saturn gave her some money through other means.

HOW TO ANALYSE THE HOROSCOPE

To analyze the horoscope the following three methods are generally followed:

1. Based on Bhava Karakatwa (house significance)
2. Based on Bhava Karakatwas and Nakshatras
3. Based on Graha Karakatwas (planetary significance)

About the first and second method, many books have been already written by different authors. Few authors only have written about the third method. In my own experience, I found that the third method is very simple, easiest and accurate and this is the method the NADI Astrologers are following while giving predictions. In this method of prediction, Nakshatra, Lagna and Bhavas are not given any importance, planets and their significance (Karakatwas) are only given more importance. Because in Hindu astrology, we have assumed that the signs and stars does not move, where as the planets are constantly moving in the Zodiac. It is only due to the movement of planets, the different changes occur in human life. Actually the changes occurs when the planets interacts with each other, otherwise there will not be any planetary effect on human being, Either a planet should have conjunction with other planets or a planet should be aspected by some other planets, Then only the aspected planet will yield specific results otherwise the planet will not yield any result. This is the principle followed in NADI astrology. It is to be kept in mind that we do not analyse the Horoscope by considering the Nakshatras and Bhavas. We consider only the Karakatwas of the planets for prediction.

We know that if two planets are in same sign, it will be considered that they are in conjunction. If a planets is placed in the seventh sign from the other it is considered that they are aspecting each other. In addition to the above, the NADI system considers the planets which are placed in the same direction are said to be in conjunction. The planets which are placed in opposite direction will aspect each other. The planets which are placed in the front sign and rear sign of a planet will strengthen or weaken the planet based on the friendship or enmity between them.

Same direction	1, 5, 9 from considered signifactor
Opposite direction	3, 7, 11 from considered signifactor
Front & rear signs	2, 12 from considered signifactor

Here, we must understand that the aspecting planets will give their Karakatwa result to the aspected planet.

Ist Step:

First decide what subject you want to analyse and select the correct signifactor (karaka) which is relevant to the subject under consideration

For example:

To know the character and appearance of the person
Consider Guru as Jeevakaraka for males
Sukra as a Jeevakaraka for Females
For profession, consider Sani
For education consider Budha

IInd step:

From considered signifactor see any planet is located in the following places.

1,5,9 (same direction) from the considered significator
3,7,11 (opp. direction) from the considered significator.

2,12 (front and rear) from considered significator

If any planet is located in the above places, then that planet will aspect the considered significator. The aspecting planets will give their Karakatva result to the considered significator. For example, let us consider Guru as Jeevakaraka. If Surya is aspecting Guru, then the character of the native will be given as below:

Reliable, philanthropic, popular, social worker, simple in nature, open hearted, short tempered,

if Budha is aspecting Guru, then, the character of the person will be given as below: Intelligent, softspoken, witty and humorous, etc. If more than one planet is aspecting Guru, then the native will have mixed character. In this manner, we can find out the character and appearance of the other family members also, education, carrier, disease and marriage of the native also can be analysed by considering the appropriate significator (karaka). I request the reader to get well versed with the nature of rasis and Karakatvas of planets before venturing in to prediction.

Example 1:

KUJA		KETU	SUK
	RASI BIRTH CHART		SURYA CHAND
			GURU BUDHA
	RAHU SANI		

In the above chart, let us consider GURU as Jeevakaraka because the native is a male and analyse the character and appearance of the person.

Guru is located in Simha along with Budha (same direction)

There are no planets in the 5th from Guru (same direction)

There are no planets in the 9th from Guru (same direction)

There are no planets in 3rd from Guru (opposite direction)

There are no planets in 7th from Guru (opposite direction)

Sukra is located in 11th from Guru (opposite direction)

There are no planets in the 2nd from Guru (front sign)

Surya and Chandra are located in 12th sign from Guru (rear sign)

Therefore we have to follow the combinations as follows:

GURU + BUDHA

GURU + SUR

GURU + CHAND

GURU + SUR

As Budha is aspecting Guru (from same sign) the native will be intelligent. As Surya is aspecting Guru (from 12th sign) the native will be popular. As Chandra is aspecting Guru (from 12th sign) the native will be settling in a different place.

As SUK is aspecting Guru (from 11th sign) the native will look handsome, he will be fond of luxury.

As three female planets Chandra, Sukra, Budha are aspecting Guru, he will be always surrounded by females. Many females will be after him. As the indicator of Skin, Budha is aspected by Chandra he will have some skin disease, (Chandra in 12th sign from Budha). As the indicator of forehead, Budha is aspected by Guru he will have bald head. (Budha and Guru both are in the same sign). As the indicator of teeth, Kuja is aspected by Rahu he will have uneven teeth settings (Rahu is in the 9th sign from Kuja, same direction).

Example 2:

		GURU	
	RASI BIRTH CHART		RAHU
KETU			CHAND
	SANI	SUKRA BUDHA KUJA	SURYA

In the above chart, let us consider GURU as Jeevakaraka because the native is a male and analyse the character and appearance of the person. This is the horoscope of Mahatma Gandhi, father of our nation.

Guru is located alone in Vrishaba

Surya is located in the 5th sign from Guru (same direction)

KETU is located in the 9th sign from Guru (same direction)

RAHU is located in the 3rd sign from Guru (opposite direction)

(but Rahu and Ketu will not aspect the opposite signs)

SANI is located in the 7th sign from Guru (opposite direction)

There are no planets in the 11th sign from Guru (opposite direction)

There are no planets in 2nd and 12th sign from Guru (from and rear)

As Surya is aspecting Guru from 5th sign, the native was very popular, he was a social worker, he became the father of the nation. He was philanthropic, he was self sacrificing in nature. As Ketu is aspecting Guru from the 9th sign, he was more religious, . He was settling the disputes, (Ketu is a karaka for dispute). He was leading very simple life. His inclination was to attain moksha by serving the people, by serving the nation.

Example 3:

	SANI KUJA	RAHU	
	RASI BIRTH CHART		CHANDRA
LAGNA			GURU SUKRA SUR BUDHA
	KETU		

In the above chart let us consider Guru as a Jeevakaraka because the native is a male and analyse the character and appearance of the person.

Guru is located in Simha along with Sukra, Surya and Budha
 Chandra is located in the 12th sign from Guru (Rear sign)
 There are no planets in the 2nd sign from Guru (Front sign)
 There are no planets in the 5th sign from Guru (same direction)
 Kuja and Sani, both are located in the 9th sign from Guru (same direction)
 There are no planets in 3rd, 7th and 11th sign from Guru (same direction)

- As Surya is located along with Guru in the same sign, he was politician, social worker, Political party leaders. He was very popular.
- As Budha is located along with Guru in the same sign he was a good speaker, good writer, very intelligent.
- As Sukra is located along with guru in the same sign he was a actor, he was writing cinema script, drama script.
- As Kuja is located in the 9th sign from Guru, he was very bold, he was fighting with government for various purpose.
- As Chandra is located in the 12th sign from Guru, he had lot of travelling aspect.
- As the signifactor of forehead Budha is aspected by Guru, he was having baldy head.
- As Chandra and Sukra are located in successive signs, he was having plumpi cheek.
- As Rahu is located in 2nd sign from Kuja, he was having uneven teeth settings. (KUJA is a significant of teeth).

PARIVARTHANA YOGA (PLANETARY EXCHANGE)

We know that nine planets own the twelve rasis, and we know the owner (or) ruler of each rasi. Sometimes it so happens that the planet A will occupy the house sign owned by planet B and the planet B will occupy the house (or) sign owned by planet A during their motion. This phenomenon is called planetary exchange (or) Parivarthana yoga in astrology.

Example (1)

	RASI		GURU
SURYA			

In the above chart Surya is located Dhanus and Guru is located in Simha. The owner of Dhanus rasi is Guru. The owner of Simha rasi is Surya. Therefore it is evident that the planets Surya and Guru both are involved in planetary exchange.

The unexpected events, may be good (or) bad will take place in natives life, if parivarthana yoga is present in natives horoscope (or) some sudden changes will take place. Therefore while analyzing the horoscope, astrologer must give importance to this parivarthana yoga. The meaning of this yoga must be carefully studied. Let us analyse some horoscopes in which parivarthana yoga is present.

SURYA SUKRA CHAND			
RAHU	BIRTH CHART Before Planetary Exchange	GURU KETU	

SUKRA GURU CHAND			
RAHU	After Planetary Exchange		SURYA KETU

In the above chart Guru and Kethu are located in Simha. As Guru is along with Kethu in the same sign the native will have religious thought. He will be doing spiritual sadanas. Surya, Sukra and Chandra all these three planets are located in Meena Rasi in the above chart. Here Surya is located in Gurus sign Meena and Guru is located in Suryas sign Simha there fore it is evident that the planet Surya and Guru both are involved in planetary exchange and they are friendly with each other. The Jeevakaraka Guru is located along with Kethu. Therefore the native is a Sanyasi because Ketu is Mokshakaraka. Surya is a politician. Due to planetary exchange, Guru will come to Meena Rasi, there he will meet Sukra and Chandra both are female

planets. Sukra and Chandra both are beautiful ladies. Since Sukra is in exaltation sign, they are rich ladies.

A politician will introduce these ladies to a Sanyasi, the sanyasi will lose his self control and fall prey to these attractive ladies because of this parivarthana yoga. Therefore in the first part of the life the native will lead a life of sanyasi. In the second part of life he will be after attractive ladies losing his self control.

Example 3:

	GURU					GURU		
KETU	BIRTH CHART Before Planetary Exchange		CHAND SUKRA RAHU		KETU	After Planetary Exchange		CHAND SURYA RAHU
SANI				SANI				
		SURYA KUJA	BUDHA			SUKRA KUJA	BUDHA	

In the above chart, Surya is located in Sukras sign Tula and Sukra is located in Surya's sign Simha. Therefore it is evident that the planets Surya and Sukra both are involved in planetary exchange. The native of this horoscope is a female. Jeeva karaka Sukra is located in Simha along with Chandra and Rahu. Chandra is a karaka for adultery and Rahu is the karaka for secret affairs. Therefore this lady will have secret affairs with many people. Due to planetary exchange when Sukra comes Thula rasi, there Sukra will join Kuja. Guru will aspect Sukra from Mesha (7th aspect). Ketu is karaka for vairagya. Guru is a karaka for spiritual leader. Ketu is a karaka for moksha. Therefore the native meets spiritual guru unexpectedly. He advises her to change her way of life and guides her in the spiritual path. In the first part of the life the native will be almost like a prostitute. In the second part of the life she will develop vairagya due to the grace of spiritual guru and she will practice spiritual sadana.

KARTHARI YOGA

If a planet is hemmed between two planets in the horoscope then the Karthari yoga is said to be present in that horoscope. The Karthari yoga is present in the horoscope, if

- 1) Three planets are located in successive sign in serial order
- 2) Three planets are located in successive star padas in serial order
- 3) Three planets are located in the same sign but in successive degrees in serial order
- 4) Three planets are located in the same direction, either in successive star pada (or) in successive degree in serial order.

Generally, all planets move from one Rasi to the other in clock-wise direction. Rahu and Ketu move in anti clock-wise direction. Sometimes, we see that a planet, instead of moving in clock-wise direction in the Zodiac seems to be moving in anti clock-wise direction. Whenever a planet is moving in anti clock-wise direction in the Zodiac, it is said to be in Retrogression. Sun and Moon will never retrograde. Rahu and Ketu are always in retrogression.

A retrograding planet will always aspect the rear sign with half aspect. A retrograding planet will give beneficial results, if a friendly planet is placed in the 12th Sign from retro planet. It will give bad results if an enemy planet is placed in the 12th Sign from retro planet. So, let us analyze few example charts.

Example 1:

KETU			SUKRA
CHAND	RASI		GURU (R)
			RAHU

In the above chart, Guru is in retrogression in Kataka Rasi. Ketu is located in the 9th Sign (Same Direction) from Guru. Ketu is Mokshakaraka and he is aspecting Guru. Therefore, the native will be a sanyasi. Sukra is located in the 12th Sign from the Guru, and Sukra is aspected by Chandra (Chandra is in 9th Sign from Sukra). Sukra and Chandra, both are beautiful ladies. Guru is running towards Sukra in retrogression. Therefore, the native, a sanyasi is running after beautiful ladies.

Ex 2:

			KETU
	RASI		GURU(R) CHAND SUKRA
RAHU			

In the above chart, Guru is in retrogression in Kataka Rasi along with Chandra and Sukra. Ketu is located in the 12th Sign from Guru. The planets Chandra and Sukra both are females, Ketu is Mokshakaraka. Here, in the beginning the native will come across many beautiful ladies. He will be troubled by these ladies. Finally, he will run away from these ladies and takes Sanyasa, because Guru is running towards Ketu in retrogression.

Ex 3:

	RASI		
	KUJA	SANI (R)	GURU

In the above chart, Sani is in retrogression in Tula Rasi. In the 2nd sign from Sani, Kuja is located. In the 12th Sign, Guru is located. Kuja is dead enemy of Sani. Guru is a friendly planet for Sani. Sani is a Karma-karaka, the significator of profession. Here, the native suffers from enemy harassment in professional career (Kuja is a karaka for enemies). Sani in retrogression approaches Guru for help, therefore the native overcomes the difficulties with the help of a friend.

Ex 4:

	RASI		
	RAHU	GURU (R)	SUR

In the above chart, Guru is in retrogression in Tula Rasi. In the 2nd Sign from Guru, Rahu is located in Vrischika. In the 12th Sign from Guru, Surya is located in Kanya. Rahu is the mouth of Kala purusha is trying to swallow the Jeeva karaka, Guru. Guru is afraid of Rahu. Therefore, Guru is running towards Surya for his help. Surya is paramatma.

MARRIAGE

How to analyze married life of a person

- (1) Consider Sukra as a significator of wife in case of males and consider Kuja as husband in case of females.
 - (2) Find out the answer for the following from the Horoscope
 - (a) Whether the person will get married or not? If the answer is NO, we need not analyze the horoscope further.
 - (b) If the answer is Yes then find out when the person will get married.
 - (c) Whether it is going to be an early marriage or late marriage. If it is late marriage, find out what is the reason for delay and suggest remedies. If any obstacle in the marriage suggest remedies to remove the obstacle.
 - (d) Find out the nature of wife or husband. How will be the life condition after marriage.
 - (e) Whether marriage life is successful or failure.
- If Sukra aspects Guru or Sani then the male native will definitely get married.
 - If Kuja aspects Sukra or Sani then the female will definitely get married.
 - If Sukra aspects Guru, it will be an early marriage in case of males
 - If Kuja aspects Sukra, it will be an early marriage in case of females.
 - If Sukra aspects Sani, it will be late marriage in case of males.
 - If Kuja aspects Sani, it will be late marriage in case of females.
 - If Ketu aspects Sukra then there will be obstacles for marriage in case of males. Even if he gets married he will have misunderstanding/disputes with his wife.
 - If Ketu aspects Kuja then there will be an obstacles in the marriage in case of females. Even if she gets married she will have misunderstandings/disputes with husband.
 - If Guru aspects above the 2 combinations then there will be a compromise.
 - If Rahu aspects Sukra, either marriage will be delayed or denied in case of Male. Even if he gets married, the wife will not be truthful to him.
 - If Rahu aspects Kuja either marriage will be delayed or denied in case of Female. Even She gets married she will not like her husband.
